2.3 Review of operating results

In the first three quarters of 2017, global economy recorded moderate recovery and Chinese economy maintained steady growth with gross domestic product (GDP) up by 6.9% year on year. With abundant supply, domestic refined oil products market witnessed strong competition. According to the statistics, domestic consumption of refined oil products increased by 6.6% compared with same period last year, among which gasoline and kerosene consumption maintained strong growth momentum. Domestic demand for natural gas accelerated, up by 15.9% compared with same period last year. Domestic consumption of major chemicals grew significantly with consumption of ethylene equivalent up by 11.3% year on year, and gross margin for chemical products remained strong.

By taking full advantage of integrated business, tapping potentials and enhancing efficiency, as well as reducing cost, the Company endeavoured to coordinate all aspects of work and realised outstanding results. In accordance with ASBE operating income of the Company was RMB 1,744.955 billion, up by 27.9% over the same period last year; net profit attributable to equity shareholders of the Company was RMB 38.373 billion, up by 31.6% over the same period last year. In accordance with IFRS, net profit attributable to equity shareholders of the Company was RMB 39.404 billion, up by 30.9% over the same period last year.

Exploration and Production: We focused on reserve increase and development returns through the operation and production with superior results achieved. In exploration, we continued to focus on discovery of high quality, large scale and low cost reserves. New oil discoveries were made in Tahe Basin of Xinjiang, Junggar Basin, Shengli Oilfield and North Jiangsu Basin, and new natural gas discoveries were made in Sichuan Basin and Ordos Basin. In production, we arranged crude oil production in a flexible manner and resumed production of some shut-down wells amid upward trend of crude oil price. Importance was attached to natural gas development, through expediting natural gas capacity construction in Hangjinqi area of Ordos and fully promoting Phase II of Fuling Shale Gas development project. In the first three quarters, oil and gas production of the Company was 332.63 million barrels of oil equivalent, down by 3.2% over the same period last year, of which crude oil production dropped by 4.0% while natural gas grew by 21.0%. The Exploration and Production Segment had an operating loss of RMB 26.523 billion with reduction of RMB 3.893 billion compared with same period last year.

Refining: Our refined oil products mix has been optimised to address market demand changes, more high value-added products were produced and diesel-to-gasoline ratio was 1.16. We actively promoted refined oil products quality upgrading, and the GB VI quality upgrading plan for “2+26” cities in North China completed ahead of schedule. We optimised crude oil sourcing and allocation, as well as adjusting procurement strategy according to changes of crude oil price, to lower our feedstock cost and transportation fee, and increased export of refined oil products to help maintain high utilisation rates of refining facilities. The advantages of centralised marketing took full play, and profitability of asphalt, lubricant and LPG was maintained. In the first three quarters, refinery throughput and refined oil products production increased by 1.3% and 1.1% respectively, among which gasoline up by 1.5%, jet fuel up by 6.3% and diesel down by 1.3% over the same period last year. The Refining Segment realised an operating profit of RMB 43.854 billion, up by 3.4% over the same period last year.

Marketing and Distribution: We took full advantages of our integrated business and distribution network, as well as further enhancing the synergy between fuel and non-fuel businesses, to actively respond to more competitive market conditions, and achieved good operational results. We optimised internal and external resources, put all efforts to expand market, and realised sustained growth in total sales volume of refined oil products. We flexibly adjusted our marketing strategies, promoted branding gasoline and increased retail volume of premium gasoline. We innovated operational models and optimised layout of service stations, and expedited revamping of storage and transportation facilities of refined oil products to further improve our distribution network. By means of “Internet+” and other marketing measures, we put more efforts on cultivation of major products and self-owned brand products and promoted rapid growth of non-fuel business. We proactively promoted vehicle natural gas business, expediting the construction and operation of CNG/LNG stations. In the first three quarters, total sales volume of refined oil products was 150 million tonnes, up by 3.1% over the same period last year. Total domestic sales volume of refined oil products was 133 million tonnes, up by 2.8%. Vehicle natural gas sales volume increased by 32.9% over the same period last year. Transaction of non-fuel business reached RMB 41 billion, up by 52.3% compared with the same period last year. The Marketing and Distribution Segment realised an operating profit of RMB 23.482 billion, down by 3.3% over the same period last year.

Chemicals: We continued the “basic and high-end” chemical business development concept to promote effective supply. In the first three quarters, we optimised operations based on marginal contribution and gross margin of chemical facilities to promote profitability. We deepened adjustments of feedstock mix to reduce chemical feedstock cost, and pressed ahead optimisation of product slate, producing more market-oriented and high value-added products. We put advantages of marketing network into full play and conducted differentiated and tailor-made measures to expand sales scale. We strengthened the integration among production, sales, R&D and application, and intensified efforts on R&D, production and promotion of new products, with the ratio of performance compound reaching 62.5% and the differential ratio of synthetic fiber reaching 89.1%. In the first three quarters, ethylene production reached 8.534million tonnes, up by 5.2% and chemical sales volume was 57.58 million tonnes, up by 14.1% over the same period last year. The Chemicals Segment realised an operating profit of RMB 16.727 billion, up by 8.3% over the same period last year.

4.3 Differences between Financial Statements prepared in accordance with the accounting policies complying with ASBE and IFRS (unaudited)

Other than the differences in the classifications of certain financial statements captions and the consolidated financial statements prepared in accordance with the accounting policies complying with ASBE and IFRS. The reconciliation presented below is included as supplemental information, is not required as part of the basic financial statements and does not include differences related to classification, presentation or disclosures. Such information has not been subject to independent audit or review. The major differences are:

(i) Government Grants

Under ASBE, grants from the government are credited to capital reserve if required by relevant governmental regulations. Under IFRS, government grants relating to the purchase of fixed assets are recognised as deferred income and are transferred to the income statement over the useful life of these assets.

(ii) Safety Production Fund

Under ASBE, safety production fund should be recognised in profit or loss with a corresponding increase in reserve according to PRC regulations. Such reserve is reduced for expenses incurred for safety production purposes or, when safety production related fixed assets are purchased, is reduced by the purchased cost with a corresponding increase in the accumulated depreciation. Such fixed assets are not depreciated thereafter. Under IFRS, payments are expensed as incurred, or capitalised as fixed assets and depreciated according to applicable depreciation methods.

Effects of major differences between the net profit under ASBE and the profit for the period under IFRS are analysed as follows:
